

Privacy Statement

Consumer Credit Counseling Service of Southern Oregon is a non-profit organization that provides money management education, confidential budget, credit and debt counseling, and debt repayment plans for both individuals and families. Our Web site is directed at providing adults with accurate information and direction in their attempts to obtain competent financial counseling.

Notice/Disclosure

It is not the intention of Consumer Credit Counseling of Southern Oregon through this Web site to secretly collect the private information of consumers. If during your visit to this site, you request information by providing your personal information or email address, that information will be used solely for the purpose of responding to you with the requested information. Further note that Consumer Credit Counseling Service of Southern Oregon does not sell, rent loan, trade, or lease any personal information collected at our site, including personal data or e-mail lists. All personal information is used solely by Consumer Credit Counseling Service of Southern Oregon or its affiliated agencies where directed by the consumer.

Security

Consumer Credit Counseling Service of Southern Oregon is conscious of the security concerns of its consumers. We are continually implementing and researching the best security options available for protecting our data internally and over the Internet. The security of your personal information is protected by Consumer Credit Counseling Service of Southern Oregon. Further, only authorized staff members have access to specific areas of consumer information.

Data Quality

All information submitted to Consumer Credit Counseling Service of Southern Oregon is transmitted via industry standard methods of data collection and transmittal. In conjunction with online data collection forms, we use a secure server that provides data encryption, ensuring the maximum protection for your transmitted information. Also, our data storage devices are designed to accurately and safely store your data, thereby substantially minimizing the possibility of data corruption.
